10. ☐ Other:	OUG DEBORA PRIMARY	PRALICIONAL H CROUCH EXAMINER	

Continuation of 2. NOTE: The proposed amendment of "selective cytolysis" and "selective replication in said target cell" raises issues under 35 USC 112, first and second paragraph. Specifically, the intended use in any target cell makes the claim indefinite because the characterisitics of the vector are dependent on the cell of interest. For example, the vector may meet the functional limitations in one cell but not another. The claim is indefinite because the metes and bounds of the functional characterisitics of the vector are not clearly defined and are subject to change depending on how the vector is used. Further, the claim amendments raise first paragraph issues for adequate teaching and description of essential HRE sequences for the selective use in any target cell of interest.

Continuation of 5. does NOT place the application in condition for allowance because: arguments are directed to claim amendments which have not been entered.
